Description:

From the Publisher Authors Peter Senese and Robert Geis join forces in Cloning Christ, a brilliantly written theological thriller which provokes the question of how genetic science and faith may co-exist in today's world. The intricately developed plot, with originally created characters who are cast behind the backdrop of an assortment of scientific and religious perspectives held by people of the world today, challenge the reader at every turn to think through these current issues as the

fast-paced thriller evolves into a story of good versus evil.

From the Author Cloning Christ is a provocative thriller that very well may ask may have its readers ask deep personal questions of themselves while in the midst of a thrilling, suspenseful global hunt between science and faith, good vs. evil, and faith vs. disbelief. The story itself originates from one particular night I spent volunteering in and around New York's Ground Zero. The night was December 5th, 2001. On that night, and after a difficult day, my own faith in God was shattered. Eventually I found myself in Trinity Church, where I had a rather loud conversation with God - questioning what his intent was in the wake of what my eyes had been witness to for the past several months. Well, the outcome of that conversation is in many ways 'Cloning Christ'. I hope you enjoy reading this story as it really does have extraordinary meaning and purpose to me.
