Mind Mapping is a note taking system which allows you to take better, faster, and more efficient notes. In conventional note-taking, you write down information line by line. With Mind Maps, you organize the information more in the form of a diagram, starting with a central key idea drawn in the center of the paper.

In addition to enhancing your note taking skills, Mind Maps help you improve your studying, writing, presenting, brainstorming, and creative skills. It is one of the best note taking skills anyone can learn.
