Description:

Publisher's Note: Products purchased from 3rd Party sellers are not guaranteed by the Publisher

for quality, authenticity, or access to any online entitlements included with the product.

Completely revised and updated, the Third Edition offers a student-friendly approach to muscle assessment, presenting the principles and methodology of assessing both joint range of motion (ROM)/goniometry and manual muscle strength for the head, neck, trunk, and extremities. Each chapter is devoted to a separate anatomical region and provides knowledge of pertinent surface anatomy and deep anatomy. Excellent photography and illustrations enhance comprehension of techniques and serve as a self-learning tool.
