Description:

From the Publisher Every once in a while a book comes out that is so good it makes people pay attention. Migene Gonzalez-Wippler's *The Complete Book of Spells, Ceremonies & Magic* is one of those books. When it first appeared it received wide acclaim in the U.S. and in England. I still have

my original copy.

But as frequently happens with even the best of books, it went out of print. When it became available to be republished, I enthusiastically went for it! Migene writes that her intention in writing this book was "to show the importance of the practice of magic in the development of the human psyche. I don't believe in the *supernatural*. I believe in nature and all things natural. Everything that happens in this world *always* happens through natural channels and in accordance with immutable cosmic laws." This book may well be the ultimate proof of that belief.

This is an amazing cross-cultural compendium of magic, theory, ritual, spells and lore. If you do magic, it will give you new directions and techniques that can advance and enhance what you do. If you would like to know about magic, this book presents the subject from the viewpoint of not only a scholar, but a practitioner. And for people interested in native cultures around the world, this book is also an invaluable resource.

In these pages you will learn all of the basics of magic, from meditation and astral projection to evocation of spirits. It covers methods of divination and the Kabbalah as well as folk magic spells for health, wealth, prosperity and romance.

I highly recommend this book. If you are a magician it simply must be among your collection of books. I know you will refer to it frequently. Get this book to advance your knowledge and your magic!

About the Author Migene Gonzalez-Wippler was born in Puerto Rico and has degrees in psychology and anthropology from the University of Puerto Rico and from Columbia University. She has worked as a science editor for the Interscience Division of John Wiley, the American Institute of Physics, and the American Museum of Natural History, and as an English editor for the United Nations in Vienna, where she lived for many years. She is a cultural anthropologist and lectures frequently at universities and other educational institutions.
