Description:

From Library Journal This provocative and highly readable book summarizes five years of research by the International Motor Vehicle Program (IMVP) at MIT into the role of the automobile industry in the world economy. The authors, all directors of the IMVP, recommend that Western automobile makers adopt the concept of lean production in all phases of automobile production. A thorough and persuasive explanation of the benefits of lean production, along with numerous examples, mainly from Japanese industry, support their recommendations. This important book offers informed insight into the auto industry; for all public and academic libraries.

Review "The fundamentals of this system are applicable to every industry across the globe . . . [and] will have a profound impact on human society--it will truly change the world."-- "New York Times Magazine" "A revealing and compellingly readable account of Japan's achievement in revolutionizing manufacturing . . . An eye-opener even for those who already knew Japan didn't do it all with robots."-- "Financial Times" "The best current book on the changes reshaping manufacturing and the most readable."-- "Business Week"
